

Evaluation of Style Advisor Performance

Comprehensive Analysis and Insights

Introduction & Objectives

➤ INTRODUCTION:

- The project aims to evaluate the performance of Style Advisors using a comprehensive set of criteria. The evaluation data covers various aspects such as store ambiance, first impressions, discovery of customer needs, trial experience, and overall customer service. The primary focus is on understanding how well Style Advisors are performing and identifying areas for improvement.

Introduction & Objectives

➤ OBJECTIVE:

- The main objective of this project is to assess and grade the performance of Style Advisors based on their *Evaluation_Score*, providing a clear view of individual performance levels. It also analyzes average scores across zones using pivot tables to uncover regional trends and differences in performance.
- Additionally, the project identifies high performers and highlights the region with the highest percentage of top achievers. Visualizations are used to present the data effectively, making key trends and insights easy to understand and actionable.

Data Overview

➤ Dataset Description:

- The dataset contains performance evaluation data of Style Advisors across multiple zones. It includes individual scores, zones, and other relevant information to assess and compare performance.

➤ Column Explanation:

- EVALUATION ID is the unique id of Style Advisors
- EVALUATION SCORE is the score given by Style Advisors
- ZONE is the area where the Style Advisor belongs
- STORE AMBIANCE, FIRST IMPRESSIONS, DISCOVERY, RECOMMENDATIONS, TRIAL EXPERIENCE & UPSELL, OBJECTION HANDLING, CLOSURE & CARE, OVERALL EXPERIENCE is the criteria by which Style Advisors breakdown the performance.
- PERFORMANCE GRADING is to distinguish their performance such as high, low, average etc.

Data Overview

➤ Data Structure:

- The dataset contains **61 records**.
- Data is organized in a **tabular format**, with each row corresponding to one Style Advisor evaluation and columns describing attributes of the visit and performance.
- There are **83 columns**, which include:
 - Identifiers (e.g., Evaluation ID, Date, Store, Zone).
 - Demographics of the auditor (Age, Gender, Location).
 - Detailed questionnaire responses across various aspects like store ambiance, advisor's behavior, recommendations, trial experience, and closure.
 - Key metrics: Evaluation_Score , and a derived Performance.
- The data covers **4 zones** and provides both numerical and descriptive insights

Performance Grading

In order to evaluate the Style Advisors' performance, a grading system was implemented based on their Evaluation Score. This helped categorize them into three distinct performance levels: High, Average, Low performers and Bottom performers.

The grading was done using fixed score ranges as given below:

Evaluation Score Range	Performance Grade
90%-100%	High Performer
70%-89%	Average Performer
50%-69%	Low Performer
Below 50%	Bottom Performer

Example:

Evaluation Score	Performance Grading
58	Low Performer
84	Average Performer
90	High Performer
36	Bottom Performer

Analysis

AVERAGE EVALUATION SCORE BY ZONE

Row Labels	Average of Evaluation_Score
East	71.57
North	76.74
South	66.61
West	71.82
Grand Total	71.79

Key Observation:

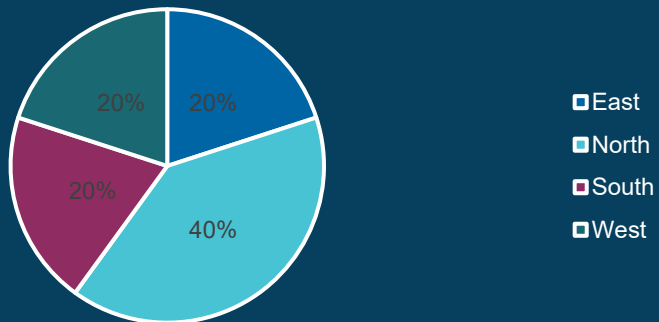

- **North Zone** has the highest average evaluation score (≈ 76.7) which indicates strong performance.
- **South Zone** has the lowest average evaluation score (≈ 66.6), indicating it needs attention and possible intervention.
- East & West are in the middle ($\sim 71-72$), but below North zone.

High Performance Analysis

Performance	High Performer
Row Labels	Count of Performance
East	20.00%
North	40.00%
South	20.00%
West	20.00%
Grand Total	100.00%

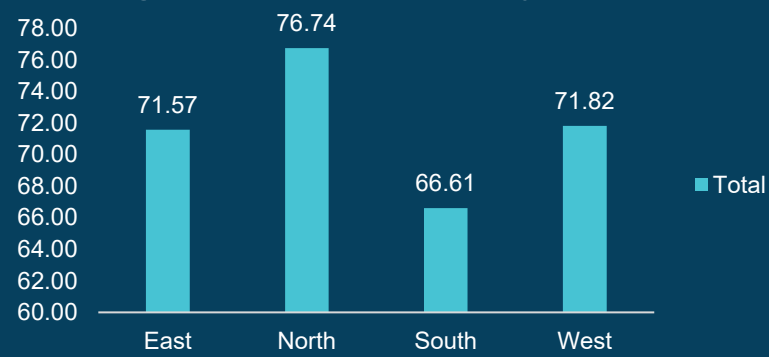

North has the highest performance percentage

Breakdown by evaluation criteria

Row Labels	Average of STORE AMBIANCE	Average of FIRST IMPRESSIONS	Average of TRIAL EXPERIENCE & UPSSELL	Average of DISCOVERY	Average of RECOMMEN DATIONS	Average of OBJECTION HANDLING	Average of CLOSURE & CARE	Average of OVERALL EXPERIENCE
East	90.57142857	81.71428571	68	45.71428571	71.2857143	80.85714286	55	71.42857143
North	93.05263158	82.31578947	75.21052632	80	63.1578947	66.68421053	63.78947368	89.47368421
South	86.55555556	81	51.61111111	62.22222222	53.66666667	81.5	49.11111111	77.77777778
West	85.76470588	84.94117647	67.82352941	68.23529412	58.8235294	80.47058824	52	82.35294118
Grand Total	88.81967213	82.59016393	65.36065574	67.54098361	60.0819672	76.52459016	55.16393443	81.96721311

Charts

High vs. Low Performers Comparison

Key Insights

➤ Summary of regions with high or low scores

- **North Zone** has the highest average evaluation score (≈ 76.7), suggesting strong performance.
- **South Zone** has the lowest average evaluation score (≈ 66.6), indicating it needs attention and possible intervention.
- East & West are in the middle ($\sim 71-72$), but below North.

➤ High Performer vs Low Performer Scores (by Criteria)

- Across all criteria, High Performers consistently score much higher than Low Performers.
- Biggest gaps between High & Low Performers:

DISCOVERY: 98 vs 52.5 → gap of ~ 45.5 points.

TRIAL EXPERIENCE & UPSELL: 96.3 vs 48.75 → gap of ~ 47.6 points.

RECOMMENDATIONS: 91.6 vs 52 → gap of ~ 39.5 points.

Key Insights

➤ Trends over time

- Scores are **highly variable** — swinging from ~48 to ~94 in just a few days
- Best days were: Oct 27 (**94**) and Oct 17 (**86**)
- Worst days were: Oct 30 (**48**) and Oct 19 (**52**)
- There's no clear upward or downward trend overall — instead, the data shows fluctuations with occasional peaks and troughs.

➤ Distribution of performance category

- **North** has the highest number of High Performers (**382**), **East** has a good proportion of high performers(**190**), whereas **South** and **West** are lagging behind with only 184 high performers.
- **West** has the largest group of Average performers(**807**), **North**(**720**) and **South**(**549**) also has significant number of Average Performers and **East** has the fewest average performers(**83**)
- **South** has the highest no.of low performers(**359**) followed by **North**(**323**) where as **East** (**187**) and **West** (**126**) has fewer low performers
- **South** stand out negatively as highest no.of bottom performers(**107**) followed by **West** (**104**) whereas **East** (**41**) and **North**(**33**) has lower number of bottom performers.

Recommendations

➤ Summary of regions with high or low scores

- Focus on **South Zone** to improve its performance.
- Share **North Zone's** best practices with other regions

➤ High Performer vs Low Performer Scores (by Criteria)

- Invest in training Low Performers on DISCOVERY, TRIAL EXPERIENCE & UPSELL, and RECOMMENDATIONS as these have the biggest gaps.

Recommendations

➤ Trends over time

- Investigate **why scores dropped sharply on Oct 19 & Oct 30** — were there operational issues, staff shortages, etc...
- Identify what contributed to peak scores (e.g., Oct 27 & Oct 17) — and try to replicate those conditions
- Since the variability is high, it may help to stabilize processes or provide refresher training to achieve more consistent results.

➤ Distribution of performance category

- Focus on **South** to reduce Low & Bottom Performers through targeted training & support.
- Work on **West** to elevate Average Performers into High Performers.
- Study **North** to identify and replicate its success factors across other regions.
- Improve consistency in **East** by addressing its Low & Bottom Performer segments.

Conclusion

➤ Recap of Findings:

- Style Advisors were graded into High, Average, and Low performers based on their Evaluation_Scores.
- Regional analysis revealed differences in average performance across zones, highlighting the highest and lowest-performing regions.
- High performers were identified, and key trends were visualized for better understanding and communication.

➤ Final thought and next step:

- The analysis provides clear insights into both individual and regional performance, serving as a foundation for improvement.
- Next steps could include targeted training for low-performing regions and recognition programs for top performers to motivate consistent excellence.
- Continued monitoring and periodic evaluations will help track progress and ensure sustained improvement over time.

THANK YOU!
